

AVA UnderCore™

Underlayment

UnderCore™ is a patent-pending High Density Core (HDC) click-and-lock underlayment for use under AVA® LVT and LLT products.

Durable and Waterproof

UnderCore™ HDC is constructed with a durable, textured waterproof core, making it an ideal substrate for soft LVT and LLT products, especially when a floating substrate and complex installation patterns are desired.

Foam Backing for Sound Reduction

UnderCore™ rigid core product features an attached foam backing which greatly improves the sound reduction characteristics of LVT and LLT products.

Quick Installation

The angle-drop locking mechanism allows for quick and easy installation.

Smooths Out Minor Subfloor Imperfections

UnderCore™ supports the overlying floor covering while bridging minor subfloor imperfections.

Versatile

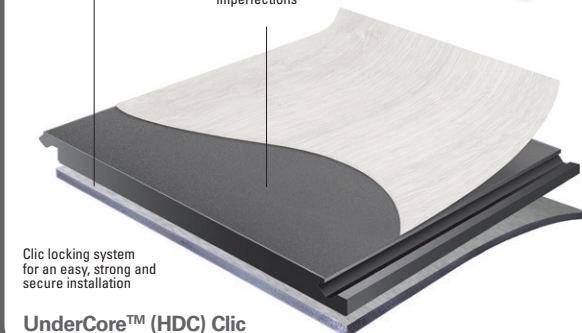

UnderCore™ is ideal for use in Multi-Family Units, Condominiums, Hospitality rooms, Retail, Dormitories and a variety of other residential environments.

SIZE

Product	Plank Length	Plank Width	Thickness s/f	Packaging
UnderCore™	59.75"	9.05"	4.93mm (1.0mm pad)	8 Pieces Per Carton / 44 Cartons Per Pallet 30.040 s/f Per Carton

Foam underlayment for sound barrier and comfort

Rigid waterproof HDC resists dents and hides most subfloor imperfections
